

Graco's Pulse Pro Fluid Management Integration with Excede®

Gain full control over your dealership's fluid inventory.

Graco's Pulse® Pro Fluid Management System Integration provides dealerships with full control over bulk fluid inventories, dispenses and tank levels. This seamless integration with Excede eliminates duplicate data entry and ensures full and accurate billing. The Graco Integration also offers support for optional pre-authorization of dispense amounts, giving dealers even more control and improved inventory management.

Key Features & Benefits

- Captures every fluid transaction, providing full inventory control
- Reduces dispense time and eliminates paperwork
- Every quart or pint of fluid is accurately accounted for and properly billed
- Verification Strength (VS) functionality offers additional control over fluid dispenses, including pre-authorization
- Supports a feature "Top Off Percent", where meters can be set up to allow top-offs between 0% and 25%

"Graco has been a wonderful addition to Thompson Dubuque; we have had lots of improvements in inventory of our fluids. We had a lot of issues tracking our fluids, and now our inventory is dead-on and has no issues."

**Joe Hoffman, Service Manager,
Thompson Truck & Trailer (Dubuque, Iowa)**
